

## SSTC 2.0 Development Kit Addendum

The following document outlines the known errors and omissions in the SSTC 2.0 Development Kit design.

That said, if you know of any additional errors or omissions, please let us as know at the email address below so that we may add them to this list. Thank you

### *SSTC 2.0 Development Kit PCB Board*

#### 1. Jumper for +5V

A jumper needs to be added across the two vias in the location shown below for proper operation of the SSTC 2.0 board. These two vias are part of the +5V power trace which goes from the U2, LM7805 linear regulator down to U3, SN74HC14, and related components.
