

Overview

These high gain WIFI antennas provide increased performance over the stock antennas included with the ASIAIR mini or ASIAIR Plus controllers. They are also convenient to use as back-up antennas, especially when traveling. From our field testing, these antennas provide both increased range and download speeds over the ASIAIR stock antennas.

Features

- Dual Band WIFI Antenna
- 2.4GHz (2400-2485 MHz)
- 5.8GHz (5150-5850 MHz)
- Gain: 6dBi
- Polarization: Linear, Vertical
- Direction: Omni-directional
- Connector: SMA
- Compatibility: ASIAIR mini, ASIAIR Plus
- Impedance: 50 ohm
- Dimensions: 7" Length, Right Angle
